Product information

ProSelect® Straights

SPF-30 Heatmaster

100% Poa pratensis

Description

The grass that likes it hot

As its name suggests, ProSelect® SPF-30 Heatmaster is fantastically heat-tolerant. This Kentucky bluegrass is a good choice when it comes to sports fields, recreational turf, lawns, or sod production. It's resistant to brown patch, and it blends well with tall fescues. It's a sister variety to Thermal Blue and has aggressive rhizomes that spread well. Features in our drought, wear, and shade programs.

Content

100% Kentucky bluegrass (Poa pratensis)

Benefits

- Great heat tolerance
- Disease-resistant
- Perfect for sports fields or lawns

Application rates

Average sowing rate	12.5 g/m²

How to use

Average sowing rate: 12.5 g/m². We recommend a cutting height of 12 – 50 mm. If you need more information, please contact your technical support

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
