

Nova Ferti-K®

The richest potassium fertilizer

Nova Ferti-K 0-0-61 is the ideal product for chloride-tolerant crops. It is the richest and yet the cheapest potassium fertilizer.

Nova Ferti-K is a nitrogen-free potassium carrier, which is important for the bulking up of many vegetables and fruits. It improves fruit color, sweetness and oil content. Along with potassium, chloride plays an important role in controlling general osmotic pressure within plant cells. It is directly involved in the regulation of leaf stomata to open or close.

Benefits

- Potassium regulates water management, reducing the incidence of stress
- Potassium is involved in the transportation of sugars and directly influences yield
- Fully soluble and dissolves quickly

Guaranteed analysis

61% Potassium oxide (K_2O),
water soluble

Recommended dilution rate for stock solutions

10-20 kg / 100 liter water
