

NOVANPK®

Nova NPK 18-9-30

Complete crop nutrition for open field and greenhouse application

Description

ICL's Nova NPK water soluble fertilizers provide complete crop nutrition for open-field and greenhouse crops. Nova NPK fertilizers have been developed with three objectives: the availability of all nutrients in the correct proportions, the convenience of solving water quality problems with one product, and environmental sustainability.

Nova NPK 18-9-30 provides excellent nutrition for the general growth and ripening stages of crops with higher chloride tolerance, is fully soluble, and ideal for drip irrigation. Drip irrigation enhances water and nutrient use efficiency while also significantly reducing nitrous oxide emission compared to furrow and sprinkler irrigation systems.

Benefits

- \\ Dependable: consistent crop nutrition
- \\ Clean materials: made with high-purity ingredients
- \\ ICL quality: tight control of ingredients, manufacturing, and consistency
- \\ Value orientation: all the necessary components without additional cost
- \\ Fully soluble: dissolves completely in water

Characteristics

Maximum solubility	440 g/L water (25°C)
EC	1.1 mS/cm (at 1 g/L)
pH	4.7 (at 10 g/L)
Packaging	25 kg bag

Application rates

Crop	Rate (kg/1000m ² per week)
Vegetables	7-14
Orchards (Coffee, Citrus, Avocado)	4-6

Contact ICL or your professional advisor for specific advice or recommendations.

How to use

Nova NPK 18-9-30 is specially recommended for crops' general growth and ripening stages.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
