Speed Germ-ZT

Extended seasonal use during sub-optimal conditions

Description

ProSelect Speed Germ ZT is a mid-green perennial ryegrass blend developed for low-temperature germination and use in overseeding programs.

In breeder trials, Agreement and GreenPlanet perennial ryegrass consistently germinated at lower temperatures than other leading varieties, helping support establishment and pitch recovery when growing conditions are less favorable.

Vermillion adds strong turf performance and disease tolerance, including Leaf Spot tolerance, supporting turf quality where the sward is under pressure.

Speed Germ ZT is designed to help maintain grass cover as part of an ongoing overseeding program. The seed is also treated with ZipSeed, which provides zinc and amino acids around the seed to support seedlings during early establishment and under stressed conditions.

Mixture content

- 25% Agreement *Lolium perenne*
- 50% GreenPlanet *Lolium perenne*
- 25% Vermillion *Lolium perenne*

Benefits

- \\ Germination at sub-optimal temperatures
- \\ Extended seasonal over-seeding
- \\ High wear resistance and excellent disease tolerance

Application rates

Average sowing rate:

32,5 g/m²

How to use

Mowing height: 25-30 mm.

If you need more information, please contact your technical support.

Technologies

ZipSeed is a seed coating with zinc and amino acids that supports germination, early root and shoot development, and establishment in challenging conditions.
