Product information

ZipSeed®

ProSelect® Blends

Regenerator RSM

- Developed for durability and fast recovery

Description

ProSelect Regenerator RSM is a sports turf seed blend containing varieties listed within the German RSM system, which sets standards for turfgrass seed mixtures according to their intended use.

The blend combines rapid germination with strong wear tolerance, helping support renovation and overseeding of intensively used turf. Good cold and disease performance also supports establishment and recovery across more challenging conditions.

Perennial ryegrass varieties produce a dense, hard-wearing sward suited to sports fields and golf tees.

Cultivars

- 20% Groundforce Lolium perenne
- 20% Calico Lolium perenne
- 45% Coletta Lolium perenne
- 7.5% Traction Poa pratensis

- 7.5% Limousine Poa pratensis

Benefits

- RSM-listed varieties selected for sports turf use
- Rapid germination supports faster renovation and overseeding
- Strong wear tolerance suits intensively used turf
- Good cold and disease performance supports establishment and recovery
- Produces a dense, hard-wearing sward

Application rates

Average sowing rate:	32,5 g/m²

How to use

Mowing height: 25-30 mm.

Technologies

ZipSeed is a seed coating with zinc and amino acids that supports germination, early root and shoot development, and establishment in challenging conditions.
