

**ProSelect®**  
Blends

## Fairway Fescue

- ProSelect Fescue Fairways is a premium blend for drought and salinity tolerance on fairways.

### Description

ProSelect Fescue Fairways is our premium fairway blend, ideal for new and existing fairway seeding. With natural tolerance to salinity, the blend is ideal for links environments and courses looking for shade and drought tolerance.

### Mixture content

- 35% Seamist Festuca rubra trichophylla
- 25% Joanna Festuca rubra commutata
- 40% Ryder Festuca rubra rubra

### Benefits

- Outstanding blend for fairways
- Premium varieties
- Shade and salt tolerant

## Application rates

Average sowing rate

30 g/m<sup>2</sup>

Trial on a small area before making changes to application rate or other variables. Site conditions can vary, and application outcomes may differ depending on local factors.

## How to use

Mowing height: 10 – 12 mm.

## Recommended period of use

[illegible]

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
