## Greens 80/20

 Fine-textured grass seed mixture for dense golf and bowling greens

### Description

ProSelect Greens 80/20 is a grass seed mixture for golf and bowling greens, combining 80% slender creeping red and Chewings fescue with 20% browntop bent.

The mixture is designed to create a dense, fine-textured sward with strong visual quality, while the fescue component contributes shade tolerance.

Greens 80/20 also maintains good winter color, helping support presentation through cooler periods.

### Mixture content

- 45% **Seamist** Festuca rubra trichophylla
- 35% **Joanna** Festuca rubra commutata
- 20% **Heritage** Agrostis capillaris

### Benefits

 Developed for golf and bowling greens

## Application rates

### Average sowing rate

30 g/m<sup>2</sup>

## How to use

Mowing height: 5 – 7 mm.

## Recommended period of use

[illegible]

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
