Renovator Pro

Feed and weed your turf, all in one

14 | 0 | 5 | TE
N P₂O₅ K₂O

Description

Keep your turf looking pretty as a picture with Renovator Pro: control broad-leaved weeds such as daisies, white clover, cat's ear, and creeping buttercup, while also giving your turf the nutrients it needs, for up to 6 weeks. Nitrogen and potassium will improve its quality, color, and growth. Also contains iron to help control moss. Can also help with keeping dandelions and plantains at bay. You'll have no problem distributing these mini granules evenly, so there's no risk of ugly speckling. Phosphate-free. Perfect for use in spring and summer on any lawn, sports field, tee, or fairway.

Guaranteed analysis

Oxide

N	Total Nitrogen	14%
	Ammoniacal nitrogen (N-NH ₄)	10.9%
	Urea nitrogen (N-Urea)	3.1%
P ₂ O ₅	Phosphorus Pentoxide	0%
K ₂ O	Potassium Oxide	5%
	Water Soluble (K ₂ O)	5%
Fe	Iron	6%

Benefits

- \\ Selective herbicide controls broad-leaved weeds in spring and summer
- \\ Nitrogen, potassium, and iron for healthy turf
- \\ Easy-to-use, effective micro-granules

Application rates

Recommended Rate 35 g/m²

Always trial on a small area before adjusting application rate or any other variables. As site conditions vary and application is outside ICL's control, responsibility for results rests with the user.

How to use

- 1 Apply to dry foliage and irrigate after 1 – 2 days if there is no rainfall. Irrigation helps with dispersion and lowers risk of mower pick-up on close cut surfaces.
- 2 Avoid applying during frosty or drought conditions.
- 3 Delay any vertical cutting and/or grooming until 3 days after application, to allow the granules to properly disperse.
- 4 Do not apply to newly sown or turfed areas for 6 months after establishment.
- 5 Avoid contact/drift onto all broadleaved plants outside the target area.
- 6 For best results, apply when light showers or heavy dews are expected or irrigate after 2 days.
- 7 Grass should not be cut for 3 days before and at least 4 days after treatment.
- 8 The first 4 mowings after treatment should not be used as a compost or mulch unless composted for 6 months.
- 9 It's best not to reseed bare patches until 8 weeks after treatment. Avoid walking on treated areas until it has rained, or irrigation has been applied. Do not apply more than 3 applications per year.
- 10 If spilled on pavement, concrete, clothes, etc. brush off immediately as it can stain. Contains iron: do not apply in case of risk of contact with concrete, marble, stone, fabric, or swimming pools.
- 11 If you need more information, please contact your technical support.

Recommended period of use

J	F	M	A	M	J	J	A	S	O	N	D

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
