Application rates

Average Recommended Rate:	30 g/m²
Recommended Rate:	25.00 - 35.00 g/m²

Always trial on a small area before adjusting application rate or any other variables. As site conditions vary and application is outside ICL's control, responsibility for results rests with the user.

How to use

1. Apply directly to dry foliage.
2. Watering-in after application helps dispersion and boosts immediate effect. Do not apply during drought or frosty conditions.
3. You should apply following completion of aeration programs, including scarification, slitting and/or hollow tining to prevent damage to the granules.
4. Properly seal partly used or damaged bags.
5. Store under dry conditions.
