Piranha

Creeping bentgrass for heat tolerance, early green-up and turf resilience

Description

ProSelect Piranha is a creeping bentgrass cultivar selected for use across a wide range of European growing conditions.

It combines early spring green-up with strong tolerance to heat, cold and other turf stresses, helping maintain performance across changing seasonal conditions. Its deeper rooting also supports resilience during periods of stress.

Piranha has a darker green color and good tolerance to Anthracnose, Dollar Spot and Brown Patch. The seed is treated with Smart Start to support faster germination and establishment.

Content

100% Creeping bent (*Agrostis stolonifera*)

Benefits

- Early spring green-up supports faster seasonal recovery
- Strong heat and cold tolerance helps turf cope with temperature stress
- Deep rooting supports resilience during dry or stressful conditions
- Good tolerance to Anthracnose, Dollar Spot and Brown Patch
- Smart Start treatment supports faster germination and establishment

Application rates

Average sowing rate

5 g/m²

How to use

Mowing height: 2-5 mm.

If you need more information, please contact your technical support.

Technologies

Smart Start is a seed coating technology that retains moisture and provides micronutrients around the seed, helping create better conditions for germination and early establishment.
