Smart Start™

LANDSCAPER PRO®

Performance (SE)

Deep-rooting grass seed blend for drought tolerance and soil stability

Description

Performance (SE) is a tall fescue-based grass seed blend developed for turf in Southern Europe, where drought tolerance and strong rooting are important.

The high proportion of deep-rooting tall fescue helps the turf make better use of available moisture during dry conditions, while hybrid Poa pratensis contributes to soil stability and perennial ryegrass supports faster initial establishment.

The combination provides a practical balance of drought tolerance, rooting strength and establishment for turf exposed to warm, dry conditions. The seed is treated with Smart Start to support germination and early establishment.

Mixture

80% Festuca arundinacea

10% Lolium perenne

10% Hybrid Poa pratensis

Benefits

- Deep-rooting tall fescue helps turf make better use of available moisture
- Supports turf performance during warm, dry conditions
- Hybrid Poa pratensis contributes to soil stability, while perennial ryegrass supports faster initial establishment
- Smart Start treatment supports germination and early establishment

Characteristics

Pack sizes	5kg, 10kg & 20kg

Application Rates

Sowing Rate:

35-50 g/m²

How to use

1. Recommended mowing height: from 25-50 mm.
2. Recommended fertilizer type: all granules.
3. If you need more information, please contact your technical support.

Technologies

Smart Start is a seed coating technology that retains moisture and provides micronutrients around the seed, helping create better conditions for germination and early establishment.
