Smart Start™

LANDSCAPER PRO®

Sun & Shade (SE)

- Grass seed blend for shaded and low-light turf areas

Description

Sun & Shade (SE) is a tall fescue, red fescue and hybrid Poa pratensis blend developed for shaded and dry turf areas in Southern Europe.

The high proportion of tall fescue provides deep rooting, helping the turf make better use of available moisture and cope with periods of dry weather. Strong creeping red fescue and hybrid Poa pratensis complement the tall fescue to support turf performance where reduced light and dry conditions can both limit growth.

The seed is treated with Smart Start to support faster, more reliable establishment by improving water availability around the seed during germination.

Cultivars

- 70% Festuca arundinacea
- 20% Festuca rubra rubra
- 10% Hybrid Poa pratensis

Benefits

- Developed for turf areas where shade and dry conditions can limit growth

- Deep-rooting tall fescue helps turf make better use of available moisture
- Combination of species provides both shade and drought tolerance
- Smart Start treatment supports faster, more reliable establishment

Characteristics

Blend type	5kg, 10kg & 20kg
Recommended mowing height	25-50 mm.

Sowing Rate

35-50 g/m²

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
