Product information

ProSelect® Blends

Extreme

Drought-tolerant seed blend for extreme conditions

Description

ProSelect Extreme is the ultimate drought combating blend. The combination of Cool and Warm-Season grasses creates a very adaptable mixture that is capable of withstanding the pressures of heat and drought. Extreme provides excellent soil stability from the intense rooting structure of the tall fescue, rhizomatous rooting of the poa pratensis and stoloniferous growth of the Bermuda. A 10% content of perennial ryegrass is added for that initial speedy ground cover.

Mixture content

10% Fastball RGL Lolium perenne

10% Heatmaster Hybrid Poa pratensis (Coated)

35% Raptor III Festuca arundinacea

35% Greenheaven Festuca arundinacea

10% Rio Bermuda Cynodon dactylon

Benefits

- Excellent soil stability
- Heat and drought tolerant
- Speedy ground cover

Application rates

Average sowing rate:	30 g/m²

How to use

Mowing height: 20-30 mm.
If you need more information, please contact your technical support.

Technologies

Smart Start is a seed coating technology that retains moisture and provides micronutrients around the seed, helping create better conditions for germination and early establishment.
