

AGROMASTER®

Trial results

Winter oilseed rape *(Scorpion, Stanley, LG Auckland)* on a loam soil

Master crop nutrition in any condition

No matter how challenging your growing conditions, you can count on Agromaster for top performance. It combines our advanced coating technology with specially selected conventional granules to give you optimum ease of use and outstanding results.

N	40%
P	0% P_2O_5
K	5% K_2O

ICL

N COATED 2-3

When

- Sowing date: autumn 2023
- Harvest date: summer 2024

Where

Poland / trial stations Pawłowice, Słupia, Radostowo

Crop

Winter oilseed rape *(Scorpion, Stanley, LG Auckland)*

Soil type

Loam / medium loam soil, pH 6.2 / silty clay soil, pH 7.6

Measurements

- Yield
- ROI

Objective

To evaluate the efficacy of different terms of application of Agromaster 40-0-5, 1-2M (30% coated N) in oilseed rape comparing to Grower practice.

Trial set-up

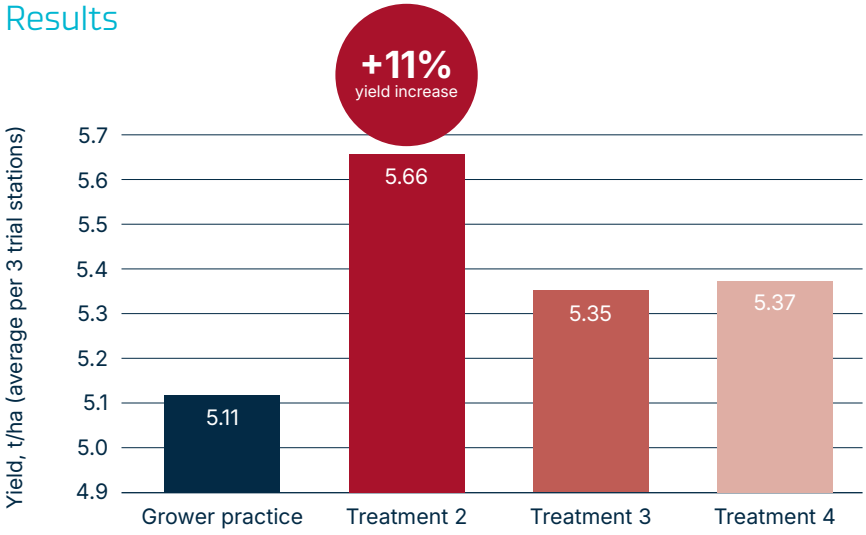

Randomized block design.

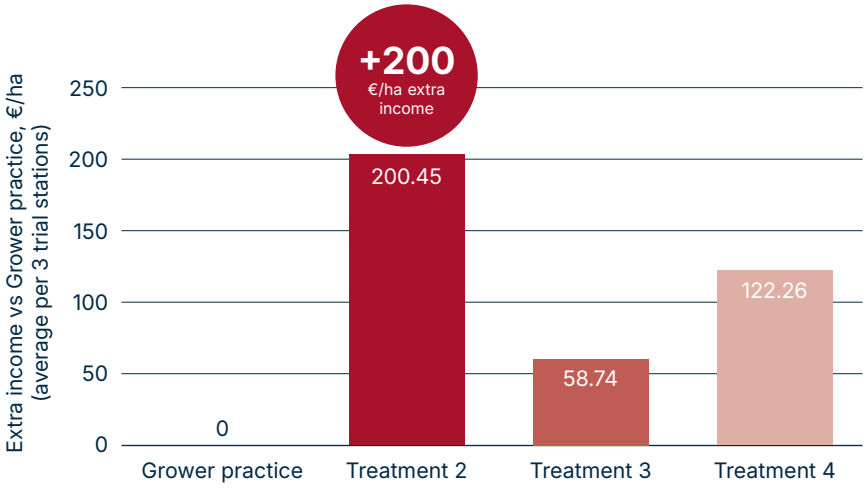

Treatments

Treatment no.	N*	P_2O_5*	K_2O*
Grower practice - autumn, broadcasted	179	50	132
2. Agromaster - autumn, broadcasted	180	50	137
3. Agromaster - autumn, top dressing	180	50	137
4. Agromaster - spring, top dressing	176	50	140

* average per 3 trial stations.
All treatments included broadcasting of fertilizers before sowing, side dressing in spring, side dressing at bud formation. Treatment 3: additional side dressing with Agromaster 2-3 weeks after sowing.

Results

Key conclusions

- Agromaster showed 5-11% yield increase in all application timing and methods.
- The best result achieved with broadcasting of Agromaster before sowing to incorporate it (+11% yield increase, +200 €/ha extra income).
