Crenzar

 Post emergent herbicide for broad spectrum control

Description

Crenzar is a water-dispersible granule herbicide containing prosulfuron (50 g/kg) and dicamba (500 g/kg). Its unique dual-active formulation provides both root and shoot uptake, delivering broad-spectrum control of a wide range of broad-leaved weeds for greenkeepers, groundsman, and professional lawn care operators.

Registered for use on managed amenity turf, amenity grassland, golf courses, sports pitches, and professional lawn care in the UK. High safety levels with no phytotoxicity found across 55 trials carried out including by the STRI.

Benefits

-  Root and shoot uptake
-  Dual active ingredient system (prosulfuron + dicamba) provides two complementary modes of action for both resistance management and superior efficacy
-  Large 2.5 ha pack coverage
-  Clippings compostable

Characteristics

Formulation type	Water-Dispersible Granule (WG)
Technology	Dual-active sulfonylurea + synthetic auxin combination
Pack size	1 kg
Pack coverage	1 kg treats 2.5 hectares at the maximum label rate (0.4 kg/ha)
MAPP	21396
Contains	Prosulfuron (50 g/kg) and Dicamba (500 g/kg)

Application rates

Maximum individual dose	0.4 kg/ha (equivalent to 40 g per 1,000 m ²)
Application rate	0.4 kg/ha (40 g per 1,000 m ²). Knapsack: 4 g Crenzar in 2–5 litres of water per 100 m ²
Water volume	200–500 litres per hectare (L/ha)
Maximum total dose	0.4 kg/ha per year
Maximum number of treatments per year	1

How to use

Recommended period of use

Month	Frequency (approx.)
J	10
