

H2Pro[®]

TriSmart Tablets

- TriSmart performance in a tablet, designed for controlled hose-end treatment of dry patch.

Description

H2Pro TriSmart Tablets deliver proven TriSmart surfactant technology in a tablet for hose-end application. Designed for targeted hand treatment of localised dry areas, the tablet disperses gradually over 20–30 minutes during normal use, supporting rapid rewetting of dry areas and helping slow subsequent dry-down. TriSmart Tablets integrate easily alongside TriSmart liquid and granular programs.

Benefits

- Supports rapid rewetting of dry areas and helps slow subsequent dry-down
- Proven TriSmart performance in a tablet formulation
- Effective treatment of localised areas using a hose-end applicator
- Uses trusted TriSmart triple-action surfactant technology
- Supports consistent turf performance during hot and dry periods
- Complements TriSmart liquid and granular programs

Characteristics

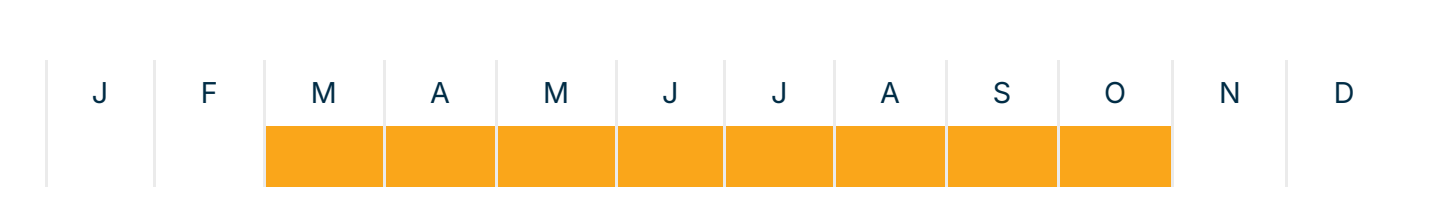

Pack size	6 × 250g
Dispersal time	20–30 minutes (dependent on water temperature and flow rate)

How to use

- 1 Apply via a hose-end applicator
- 2 Disperses over 20–30 minutes during normal use
- 3 Direct application to hot spots, drying areas, or areas requiring additional attention
- 4 Targeted application is most effective when guided by soil moisture (VMC%) measurements using a moisture meter probe

Use on greens, tees, green surrounds, greens collars and approaches, lawns, any areas of turf suffering drought stress.

Recommended period of use

Attention
