

H2Pro[®]

TriSmart Granules

- TriSmart performance in a patent pending mini-granule formulation for targeted dry patch treatment.

Description

H2Pro TriSmart Granules deliver proven TriSmart surfactant technology in an easy-to-apply granular formulation for treating localised dry areas. Using a patent-pending polyhalite mini-granule carrier, the wetting agent is applied directly and, once watered in, helps reswet dry areas quickly and slow subsequent dry-down. Ideal where spraying is impractical and works within TriSmart liquid and tablet programs.

Benefits

- Supports rapid rewetting of dry areas and helps slow subsequent dry-down
- Proven TriSmart performance in a mini-granule formulation
- Effective treatment of localised dry areas, including hard-to-spray areas
- Uses trusted TriSmart triple-action surfactant technology with a patent-pending polyhalite mini-granule core
- Polyhalite core provides macronutrients including potassium, calcium and magnesium, with surfactant technology helping move them into the soil
- Complements TriSmart liquid and tablet programs

Characteristics

12.5 kg

Application rates

12.5–15 g/m²

How to use

- 1 Apply granules evenly to the target turf area.
- 2 Use a quality rotary or drop spreader with correct spreader settings when covering larger areas.
- 3 Irrigate after application, or apply before rainfall, to help the wetting agent move into the soil and improve effectiveness.

Use on greens, tees, green surrounds, greens collars and approaches, lawns, any areas of turf suffering drought stress.

Recommended period of use

[illegible]
