## Description

When your vegetable, fruit, and arable crops demand a high-potassium, low-phosphorus nutrient-rich kick, look no further than Agrolution<sup>®</sup> Special 324 fertigation fertiliser. This water-soluble application is designed to help you optimise your plants' nutrient availability and intake. Pre-empt any blockages or deposits within your soft-water irrigation systems thanks to its high levels of purity, solubility, and acidifying effect. Its added calcium means you can prevent diseases such as blossom end rot, while also prolonging the product's shelf life.

## Guaranteed analysis

### Oxide

## Benefits

 Provides and increases availability of necessary nutrients

 Made from clean, pure raw materials

 Includes magnesium to optimise plant energy and photosynthesis

## Application rates

The average recommended application rate is 40-50 kg/ha per week.

---

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## How to use

-  The Agrolution® range offers a wide range of analyses covering all crop growth stages while providing tailored assistance to specific soil and water types.
-  Store under dry conditions.
-  Properly seal partly used or damaged bags.
-  For tailored advice, contact your ICL advisor and ask for information specific to Agrolution® Special.

## Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
