

Mid-Season Nutrient Stars

High-Efficiency Liquid Solutions for In-Season Nutrient Challenges

When weather, stress, or rapid crop growth creates nutrient gaps, targeted foliar solutions can help maintain plant performance, improve nutrient efficiency, and protect yield potential.

Challenge	Product	Guaranteed Analysis	Active Ingredient	Why It Stands Out
Stress limiting plant function?	FORMULA 1	0-29-26	Phosphite (phosphorous acid) technology	Supports photosynthesis, nutrient movement, and plant health when stress slows crop function.
Need potassium fast?	UPTAKE K	0-0-23	Potassium acetate + liquid humates	Highly available potassium designed for rapid absorption and movement within the plant.
Rethinking mid-season phosphorus?	CHALLENGE	8-32-5 + 0.05% Zn	Neutral pH Potassium-Tri-Poly Phosphate (KTPP) with organic acids	Efficient phosphorus source designed to supplement soil fertility during critical growth stages.
Micros missing from your tank?	X-TRA	Various analyses	Complete micronutrient package + ETS technology	Helps address hidden micronutrient deficiencies before they impact performance.
Want to make every drop count?	MULTI-SPRED	98% Active Adjuvant	Organosilicone + MSO + Non-Ionic Surfactants* <i>*various adjuvants available</i>	Improves coverage, spreading, penetration, and uptake. Connect with an ICL expert to choose the right adjuvant for your goals and tank mix
