

Protect Your Investment in the Field

Mid-Season Foliar Nutrition Solutions

No season goes exactly to plan. Mid-season foliar nutrition provides targeted support to help protect yield potential, quality and profitability when it matters most.

Product	Guaranteed Analysis	Active Ingredient	Why It Stands Out
FORMULA 1	0-29-26	Liquid phosphite (phosphorous acid) technology	Stress Response: P + K to support photosynthesis, nutrient movement, and plant health when stress slows crop function.
UPTAKE K	0-0-23	Liquid potassium acetate + liquid humates	Quality Control: Highly available K designed for rapid absorption and movement within the plant.
CHALLENGE	8-32-5 +0.05Zn	Liquid Potassium-Tri-Poly Phosphate (KTPP) with organic acids	Fuel Reproductive Growth: Efficient P source designed to supplement soil fertility during critical growth stages.
NOVA PULSE*	0-6-4 +1Mg +1.3S +0.5Co +10Mo +6Zn	Water-soluble P-K foliar fertilizer, plus secondary + micronutrients	Improve NUE: P, K, Zn, Mg, Mo and Co support nutrient efficiency and fruit, pod and grain development.
NOVA FLOW*	5-10-20 +9Mg +11.7S +0.5B	Highly soluble, advanced alternative to magnesium nitrate	Photosynthesis & yield potential: Concentrated NPK + S & B to support growth during peak demand.
NOVA FINISH*	8-12-40 + micros	Water-soluble NPK with fully chelated EDTA micronutrients	Final Quality: Boost of premium quality K + micros to support starch and sugar accumulation and crop quality.

Agronomist Tips

Build nutrient synergy

Pair complementary solutions, such as Nova PULSE® + Nova FLOW®, to support multiple crop needs.

Support the whole system

Add BIOZ Diamond® to foliar programs to support soil biological activity and nutrient availability.

Simplify applications

Where compatible, combine nutrition with crop protection sprays to improve efficiency and timing.
