

X-TRA

Zinc X-TRA 0-0-0 +10% Zn, 4.7%S Enhanced Nutrient Fertilizer

 An enhanced liquid fertilizer contains zinc and sulfur to prevent and treat deficiencies.

Description

Zinc X-TRA is a powerful liquid fertilizer treatment derived from zinc sulfate. Zinc is critical for proper crop development, and Zinc X-TRA ensures the highest availability, and quick uptake ensures nutrients don't just wash off leaves but are taken up by the plant. Formulated with a unique proprietary Enhanced Translocation System (ETS) technology, ZINC X-TRA can increase zinc availability at lower rates compared to other zinc applications. The lower pH formulation also improves compatibility with fertilizers and crop protection solutions, offering a reliable and effective choice for crops requiring zinc supplementation.

Guaranteed analysis

N	Total Nitrogen	0%
P ₂ O ₅	Soluble Phosphate (P ₂ O ₅)	0%
K ₂ O	Soluble Potash (K ₂ O)	0%
S	Sulfur	4.70%
Zn	Zinc	10%

Benefits

- \\ Helps treat and prevent zinc deficiency
- \\ Improves zinc availability even at lower rates than other zinc sources
- \\ Proprietary ETS technology to improve uptake and translocation
- \\ Highly compatible with most fertilizers and crop protection inputs

Application rates

To ensure optimal performance, we recommend conducting limited field tests under your specific growing conditions before broad-scale use. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

For more information, always refer to the product label or contact an ICL product expert for tailored advice.

How to use

Please consult your ICL product expert or agronomist for usage information.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
