Description

Agrolution pHLow High PK 12-26-26 supplies a high dose of plant-available phosphorous and potassium, plus a complete micronutrient package. Delivered via fertigation at the root zone, this formulation is an ideal source of early season nutrition for new plants. As part of the Agrolution pHLow line, this fertilizer offers the convenience of providing essential nutrients while solving for water quality and soil pH challenges. Reducing stock solution pH, Agrolution pHLow neutralizes highly alkaline irrigation water and keeps vital nutrients from precipitating. Lowering pH in the soil solution makes nutrients more available to plants. The high solubility of 4 pounds per gallon makes it well-suited for early-season applications. Agrolution pHLow High PK 12-26-26 is a versatile fertilizer that works well for growing transplants and establishing plants in the field for high-quality fruits and vegetables.

Benefits

- Perfect source of early-season nutrition
- Contains high PK plus micronutrients
- Manages high alkalinity and pH
- Improves nutrient delivery
- Reduces stock solution pH to neutralize highly alkaline irrigation water and keep vital nutrients from precipitating
- Ideal for newly placed transplants and crop establishment
- Dissolves quickly, safely and completely
- All-in-one nutrient and pH management
