

NOVA®

Nova MagPhos 0-55-18+4.2Mg Fertilizer

Get your plants off to a quick start with MagPhos

Description

Nova MagPhos 0-55-18+4.2Mg is a premium, fully water-soluble fertilizer that supplies your plants with a high dose of phosphorus and magnesium, plus potassium. Nova MagPhos has been specially formulated to give plants the quick start they need and boost their chlorophyll levels. Our exclusive technology ensures you get high quality and purity in one of our most concentrated formulas. It's unique because it's slightly acidic, even with the large amounts of phosphorus and potassium it packs. Ideal for crops that need plenty of magnesium, such as cucumbers, peppers, tomatoes, or leeks, as a foliar spray or with a fertigation system. Our free-flowing crystals dissolve quickly and easily, and they're chloride- and sodium-free.

Guaranteed analysis

N	Total Nitrogen	0%
P ₂ O ₅	Soluble Phosphate (P ₂ O ₅)	55%
K ₂ O	Soluble Potash (K ₂ O)	18%
Mg	Magnesium	4.2%

Benefits

- \\ Provides a boost of magnesium—an essential nutrient
- \\ Highly concentrated phosphorus levels promotes a quick start
- \\ Boosts root systems and fruit sets; suitable for use in all stages
- \\ High purity; chloride- and sodium-free
- \\ Easy to dissolve; fully soluble
- \\ Effective alternative to MKP and magnesium nitrate
- \\ Suitable for fertigation and foliar application

Application rates

Nova MagPhos can be applied through foliar sprays, soil applications, drip irrigation, or during transplanting.

Recommended dilution rate for stock solutions: 10-15 kg / 100 l water

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

Nova MagPhos is recommended to correct calcium deficiencies in irrigation water and is ideal for applying phosphorus and potassium, particularly during the plant development and ripening stages.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
