

Fibagro[®] Advance Pot Topper FT

Smart, sustainable weed control powered by Fusion Technology

What is the product?

Fibagro[®] Advance Pot Topper FT is a new, high-performance pot topper developed by ICL with FSC[®]-certified woodfibre and innovative Fusion Technology (FT). Once watered, the product forms a light-blocking, moisture-retentive layer that suppresses weed and liverwort growth - without compromising water penetration.

Top Tip!

Perfect for mail out orders in challenging transit conditions

Superior
weed
control

What are the results?

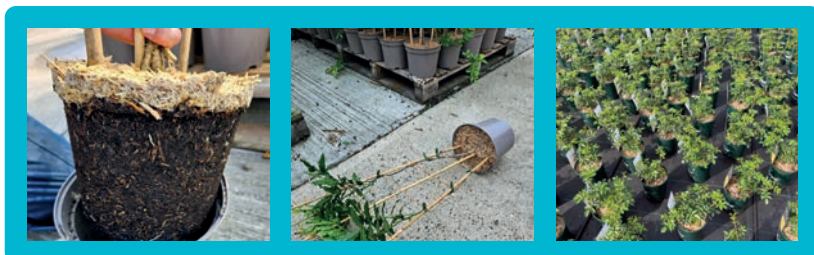

Extensive trials show weed suppression, with improved labour efficiency and cleaner dispatch. The product is free of chemical additives and 100% derived from sustainable sources.

"Once applied and watered, the unique Fusion Technology binds the pot topper in place, making it wind-resistant and effective even if your pot falls over"

Stuart Gammage, ICL's Technical Manager

Why should you buy it now?

Get ahead of spring weed pressure - order now to benefit from winter production and ensure top stock availability for peak season.

How will the Pot Topper benefit your nursery?

- Reduces weed and liverwort growth
- Reduces labour costs
- Quick and simple to apply - manually or by machine
- Stays in place even if pots fall over*
- Supports moisture retention and plant health
- Incorporates sustainable British timber industry by-products

Ideal for nurseries seeking a reliable, cleaner, and more sustainable way to manage weeds in container-grown crops.

Suppress weeds today!

How do you apply it?

- Apply a consistent layer on top of freshly potted containers (minimum of 2.5cm depth)
- Activates on watering - ensure irrigation post-application
- Suitable for machine or hand application
- Wear gloves when applying - the product is sticky but non-hazardous
- Shelf life: 2 months (store bagged until use)
- Store dry and protect from rain, product will be activated if allowed to get wet

Available in 75L bags, Probales, or bulk bags
