Foliar Nutrition Line

Booster 08-16-39 Fertilizer

Flowering-Stage Foliar Fertilizer

8	16.0	39.0	TE
N	P_2O_5	K_2O	

Description

Nutrivant® Booster is rich in Potassium which is a macronutrient essential for plant growth at the flowering stage so as to extract a higher fruit yield from a plantation. The formulation ensures there's no drying out of the flowers which fall off and reduce the crop yield. It also bolsters better fruit formation thus increasing the marketability of the crops.

Related technologies

FertiVant Technology is based on the NutriVant adjuvant that can break through the leaf cuticle and enable high penetration rate of the foliar solution, with all its dissolved ingredients.
The advanced FertiVant Technology ensures efficient uptake of all valuable minerals and bio-stimulants, contained in Nutrivant formulas. This is how the FertiVant Technology dramatically increases the effectiveness of the foliar spray and improves yields, produce quality and growers' revenues. Its high effectiveness enables reducing spray volumes, which means a marked cost saving for the grower.

Learn more about Fertivant

Benefits

- Increase flowering and fruiting
- Reduce flower dropping and increase disease resistance
- Increase nutrient use efficiency and uptake

Application rates

Minimum Avg	1kg/acre
Maximum Avg	2kg/acre

Dose your irrigation water with this solution, adjusting according to your crops' conductivity or ratio requirements. Trial first on a small scale before changing the rate, or any other variables, as circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results

How to use

1. Add water to the fertilizer
2. spray on leaves

To be used for Foliar applications

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
